

Hood fitting service available

Extra length valances

R STYLE HOOD MGB 1971-80 (WITH ZIP OUT WINDOW)

Black mohair hood, fitting the black painted folding hood frame used on 1971-80 MGBs. The 'R Style' hood features an arched, zip out rear window without rear quarter windows, following the design of the MG RV8 hood.

It may also be fitted to pre-1971 MGBs/Cs originally fitted with with grey 'packaway' or grey 'Deluxe' folding hood frames, so long as the later black folding hood frame is also fitted. Hood types and hood frame types are not interchangeable, so frame identification is vital before placing a order.

Mohair is a tightly woven fabric usually found on luxury convertible cars comprising three layers: an external weather-resistant layer, a central rubberised waterproof membrane and an interior lining. Club hoods feature padded and strengthened extra length valances for improved weathersealing and durability. Header rails are not included, but every possible fastener is factory fitted and the hoods are designed to ensure simple DIY fitment to your existing header rail and frame.

Easy to fit. Fitting a new MGB hood is not the difficult task it is often rumoured to be. Using the Club's preferred 'no-glue' method, allowing adjustment of the hood on the header rail, an MGB hood can be beautifully fitted in around 2 1/2 hours.

FITTING INSTRUCTIONS

Basic hand tools required. Craft knife, crosshead screwdrivers, flat bladed screwdrivers, pop rivet gun, electric drill and chalk. Additionally, to fit 'Durable Dot' press-on hood fasteners, you will require a medium weight hammer and a punch and die set (available at a very reasonable price from MGOC Spares).
