

SEAT BASE ASSEMBLY MGA (NOT DELUXE)

Fitting all MGA Roadster and Coupe seats except the Deluxe type, the seat base assembly is an essential part of the rebuild of most MGA seats.

Being close to the floor in a 1950s design sportscar means that seat bases have a tough life, succumbing eventually to the combined attacks of damp rot and weight bearing stresses. If your MGA seats are ready for reupholstering, it's a fair bet they'll need new seat bases too.

A composite assembly of plywood, wood and steel mesh, the Club seat base assembly is strong and more than capable of withstanding the rigours of sportscar usage, while also being a good reproduction of the original item used in MGA seats. It is offered in right and left hand seat versions.

Moderate skills required. Reupholstering Roadster or Coupe seats is achievable by average skilled enthusiasts, though trimming experience would be advantageous to correctly plump out corners and other areas with extra wadding on these old style, traditionally upholstered seats. If you are concerned, remember that the Club supplies new or exchange reupholstered MGA seat assemblies.

Basic hand tools required. Roadster and Coupe seat base covers secure to the wooden seat base with a staple gun, the foam being glued in place first.
